Phase 5: Tableau Analytical Story Design

Narrative Flow, Story Points & Clinical Takeaway Structure

1. Story Point Architecture

• Scene 1: Cohort Overview & Constant Score Diagnosis - Establishes the 5,000-patient baseline and explains why the constant 100.0 raw score required calibration.

• Scene 2: The Age Inflection Point & Multi-Morbidity Surge - Demonstrates that young adults (18-45) are healthy, while seniors (61-80) suffer massive comorbidity.

• Scene 3: Modifiable Lifestyle & Biomarker Drivers - Identifies smoking, inactivity, hypertension, and hypercholesterolemia as compounding risk catalysts.

• Scene 4: High-Risk Cohort Identification & Care Roadmap - Outlines a 4-tier clinical intervention protocol from digital wellness to multi-specialist care.
